CTC Laboratory Testing: Physical and Chemical

With accredited laboratories, CTC proposes a matrix of tests and analysis to assist its clients in improving quality.

CTC in Vietnam, physical and chemical testing, audit and inspection

Physical Testing:

- According to various international and European standards (ISO, EN, DIN, BS, NF) and US standards (ASTM, AATCC, ANSI, US CPSC) With technical assistance and customized services to make sure that you carry out the right test for the right product and the right market.

Chemical Testing:

CTC participates in various working groups, technical committees and round-robin test sessions to define international standards. CTC assists you to make sure that you implement the right range of chemical analysis to ensure products are safe and harmless when in contact with a person's body/skin: Restricted Substances List, Proposition 65, REACH...

Gloves PPE Testing

CTC in Vietnam offers comprehensive PPE testing programs. CTC gives its clients close and easy access to testing facilities which correspond to European market and quality standards.

Audits

The first need of a company is to be organized in an efficient way in order to ensure Quality ... Our Vietnamese team also provides dedicated inspection and auditing services to help our clients manage and secure their sourcing needs.

Factory audits:

Auditing the organization, manufacturing process, industrial tooling, compliance and product safety.

Social audits:

Auditing of factory compliance with labor regulations and "code of good practice" according to international standard SA8000

Laboratory audits:

To check or develop the capacity of your internal laboratory or your suppliers' laboratories with a lab specialist as a third party, we will define or check the organization of the laboratory, improve standards, train staff, calibrate machines and certify the laboratory using pragmatic, systematic and accurate procedures.

.Inspections

CTC has been an inspection center in Vietnam for more than **20 years specialized in the fields of textile, footwear, luggage and leather goods**. We provide inspections and product assessments based on the item's final use and according to the level of quality of the products.

In-Line inspection:

This is the best time to check quality. CTC aims to improve the production process and to advise the factory on making the necessary enhancements before production is completed.

Pre-shipment inspections:

We check the quality of the products before they leave the factory.

Final and random inspections:

We check the quality of the products and packaging just before they leave the factory or the shipment platform.
