Resistance to rough handling (drum test)

Objective

The purpose of this determination is to assess the item’s resistance to the rough handling that it might undergo during its life cycle (drops, airport conveyor, etc.)

Principle

The weighted luggage is placed inside a drum, inside which it is subjected to a certain number of drops. Any irreversible deterioration is noted.

Type: Physical and mechanical test
Standard: CTC method - CTC-P-BA-014
Product: Luggage
Criteria: Mechanical resistance
