

Special ergonomic features

Objective

This test assesses a product's ergonomic features.

Principle

Shoes are considered compliant if all answers are positive in the questionnaire indicated in the standard.
If the shoes are rigid (see sole flexion test), the questionnaire does not apply.

Type: [Physical and mechanical test](#)

Standards: [EN ISO 20344 §5.1](#) / [EN ISO 20345 §5.3.4](#)

Product: [Footwear](#)

Criteria: [Mechanical risk](#) / [PEE](#)

Component: [Whole shoe](#)
